HELP SUNSQUATCH SAVE OUR PLANET

An Activity Book for Kids

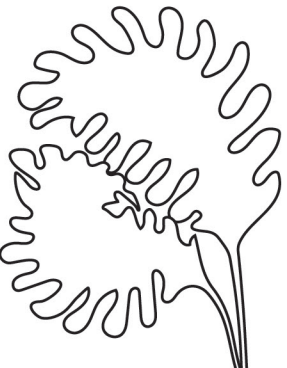

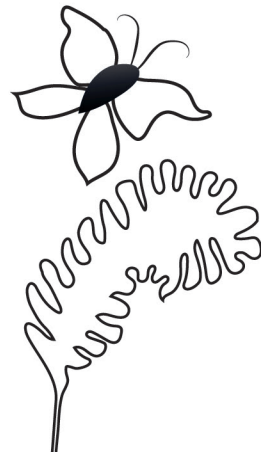

I pledge to take care of the planet and encourage those around me to do the same so everybody can live happily and healthfully under the sun!

Signed, _____

**SUNSQUATCH
HIGH FIVE!!!**

Sunsquatch can recharge in the sunshine and people can breathe a little easier now—but it's not over!

Sunsquatch needs you and your friends to keep fighting for clean, renewable energy for our planet... and Baron von Carbon might one day go solar too because even he can't deny it—solar power just makes sense!

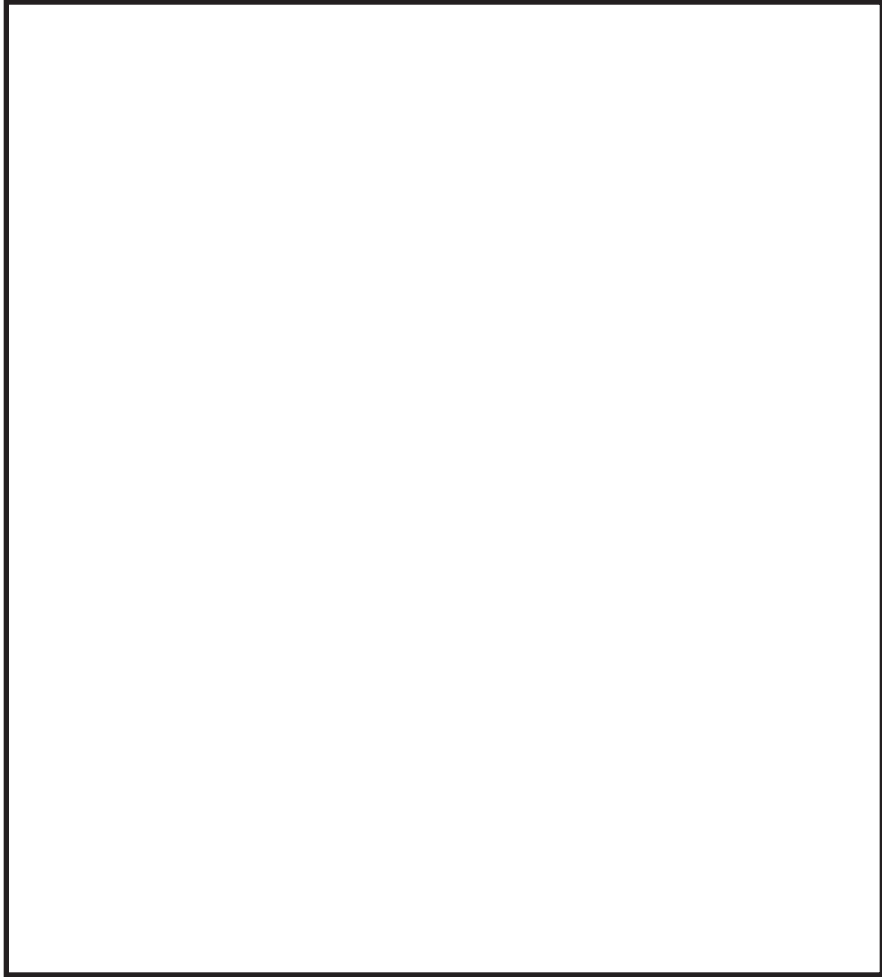

YOUR SOLAR HOME

When the storm cleared, the sun appeared once more and chased away the smog. Sunsquatch and friends equipped their homes with the technology they needed for a secure energy future and a healthy planet!

Bring clean renewable energy to your home too!

Draw a picture of your house with solar panels!

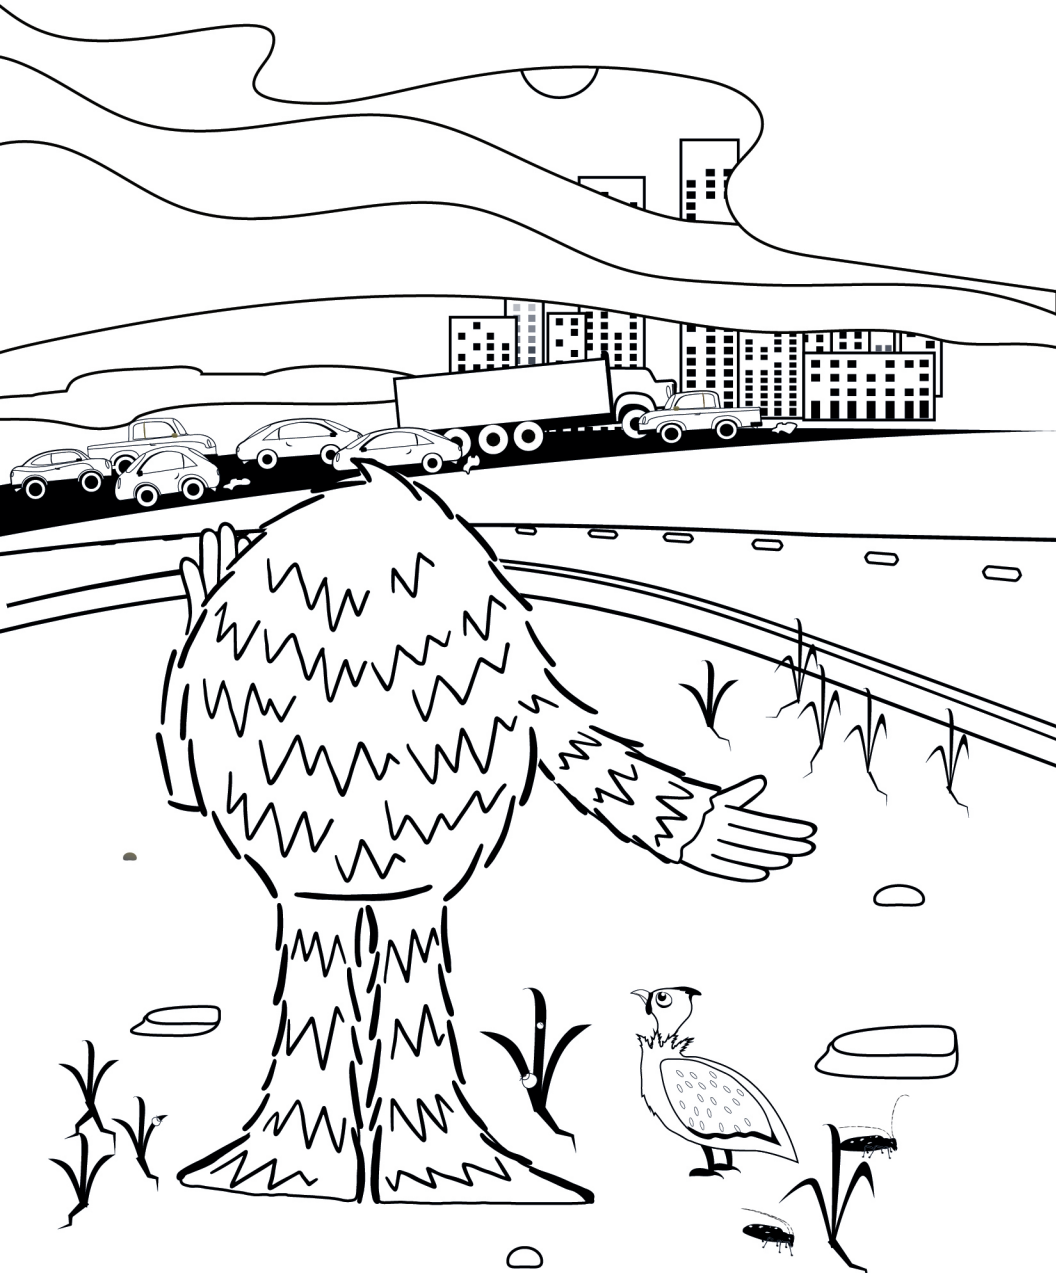

As the yellow sun rose from the hills to gently nudge the snoozing forest, a wonderful, joyful, furry creature awoke and stretched from a long slumber.

Glowing with optimism and sunny happiness, Sunsquatch strode forth from the forest to greet the planet.

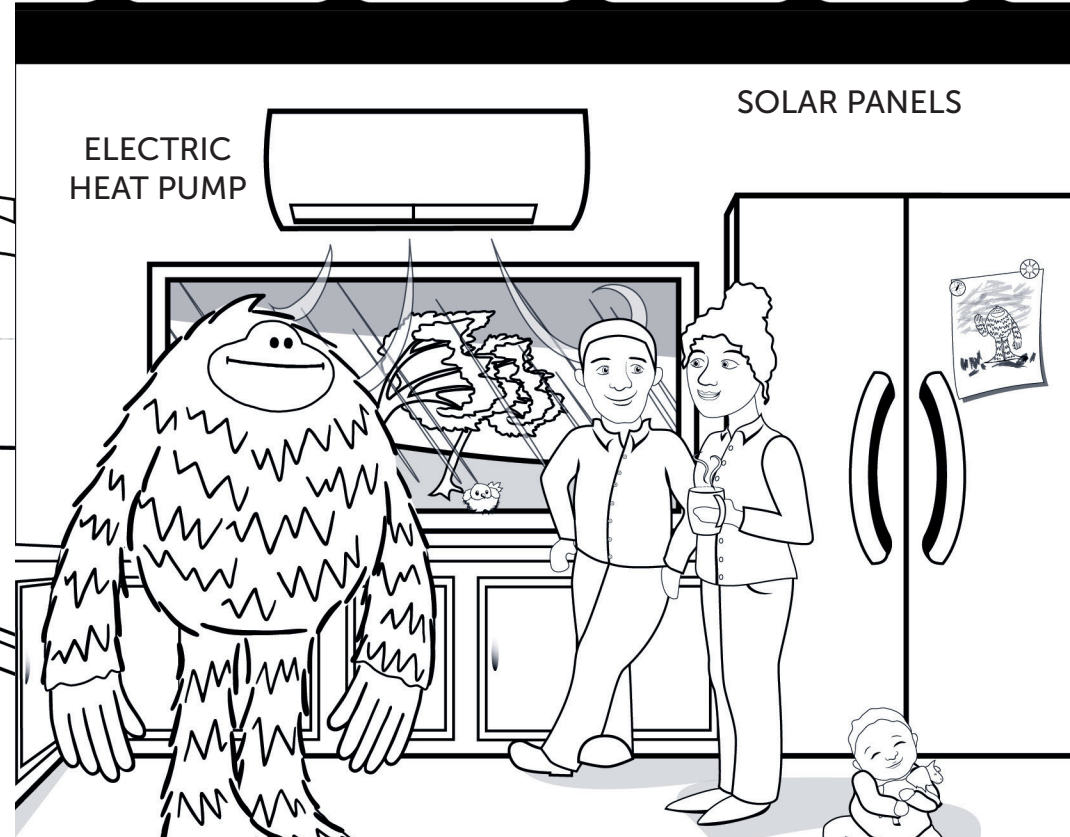

But Sunsquatch discovered that the planet was sick! Carbon polluted the air and caused oceans to warm. Ocean acidification made it hard for lobsters and clams to grow their shells—and on land, pesky ticks swarmed and plagued animals and humans alike.

BATTERY-POWERED HOME

What things in your house need to run when the power is out?

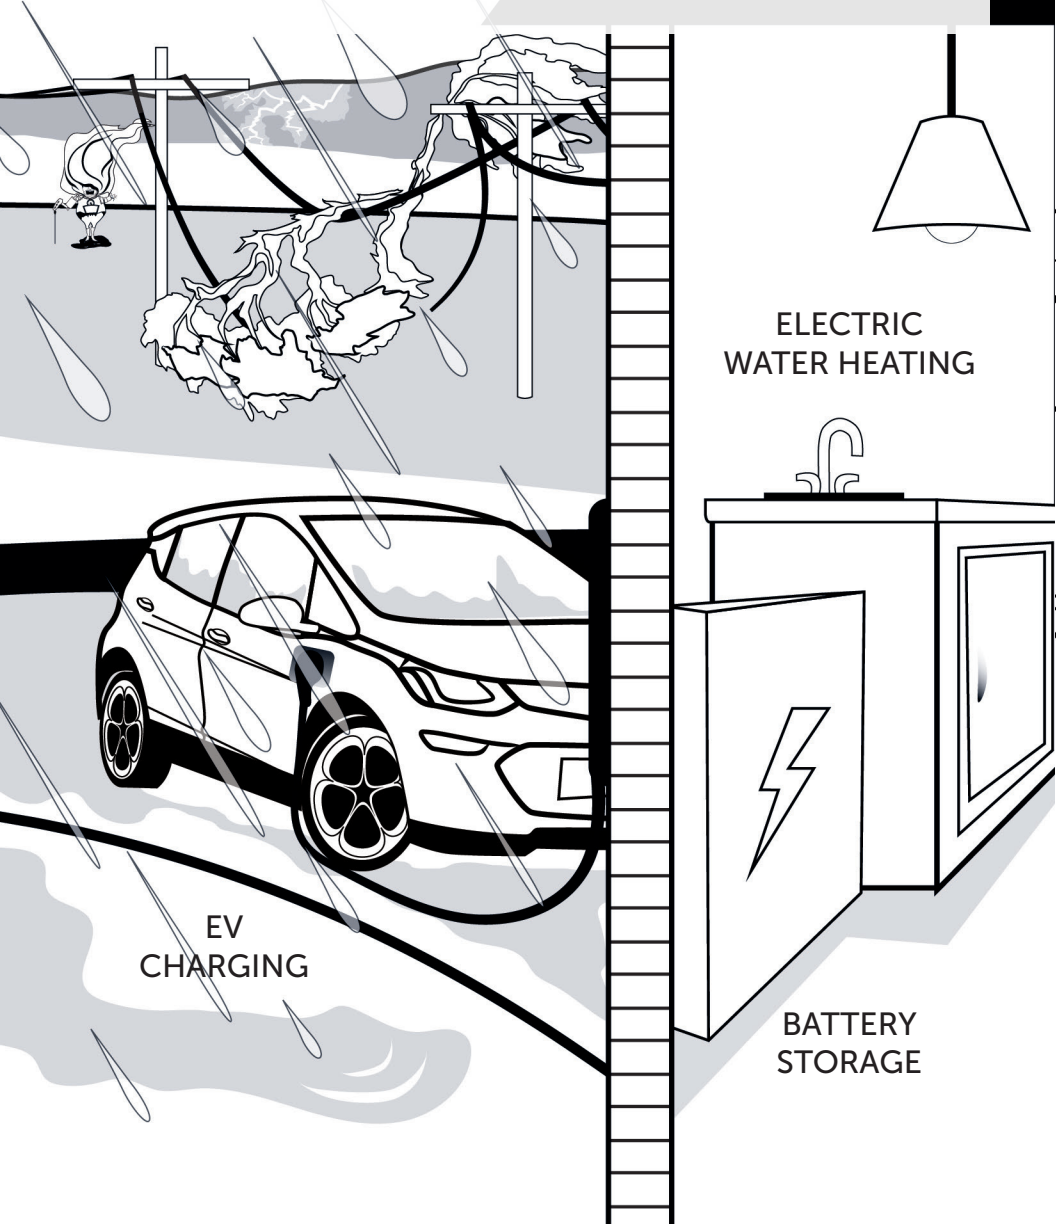

Make a list below!

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____

Sulking furiously and angry from being forced to exercise, as families all around started powering their homes with solar, Baron von Carbon brought the largest storm he could conjure.

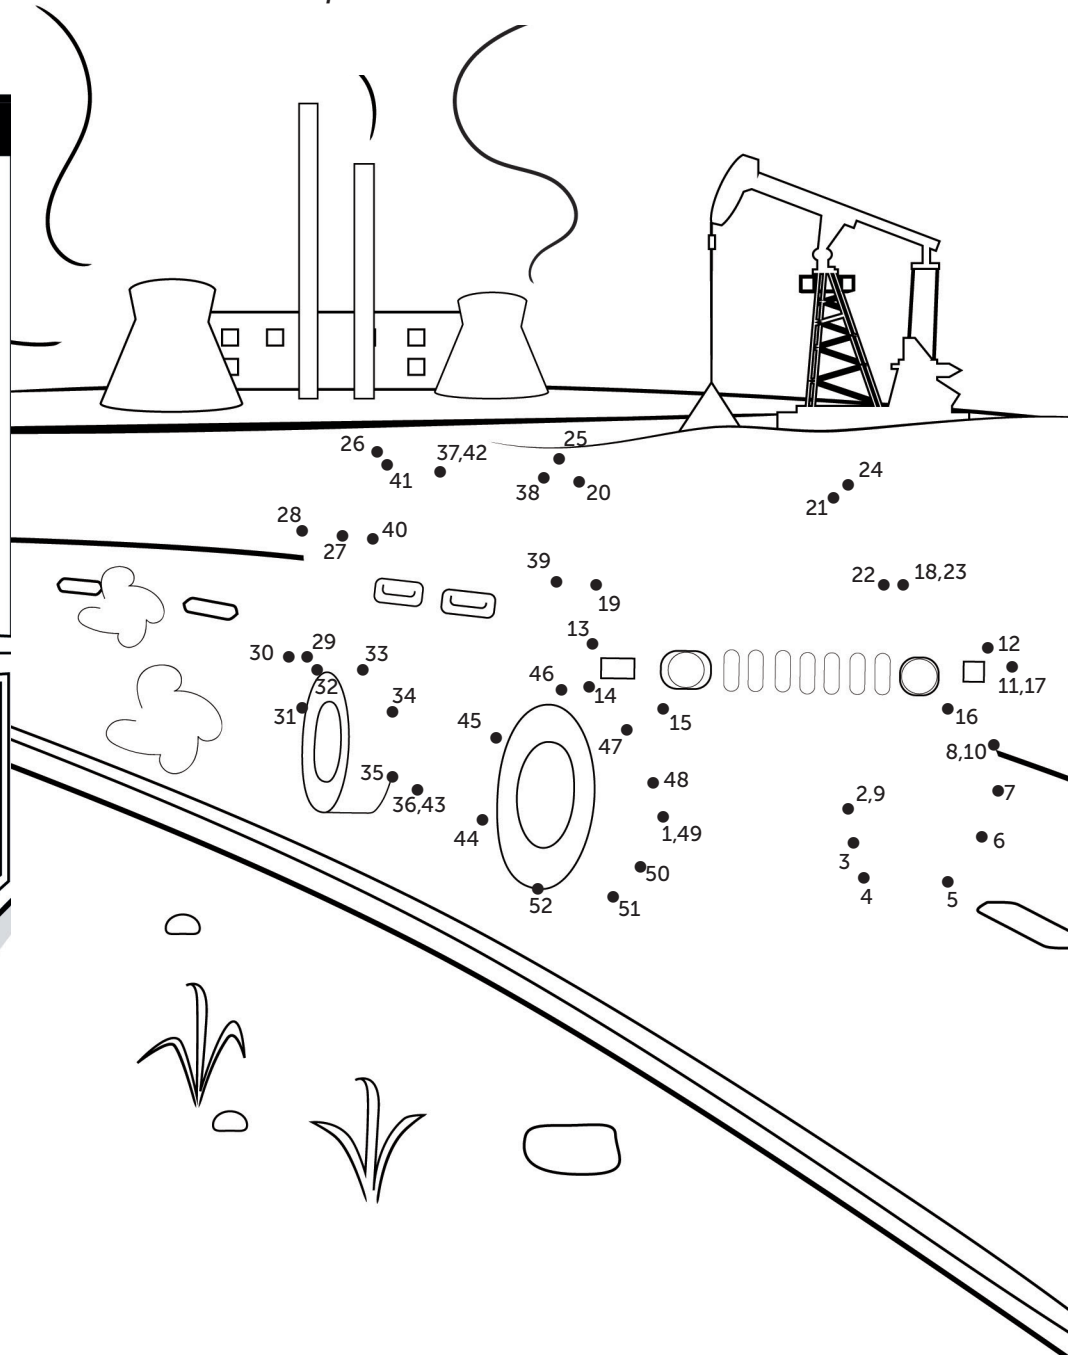

Fierce winds brought down electric lines, and inky clouds blotted out the sun—but with the help of back-up batteries, Sunsquatch kept the lights on and refrigerators humming, while the people stayed warm and safe inside their homes.

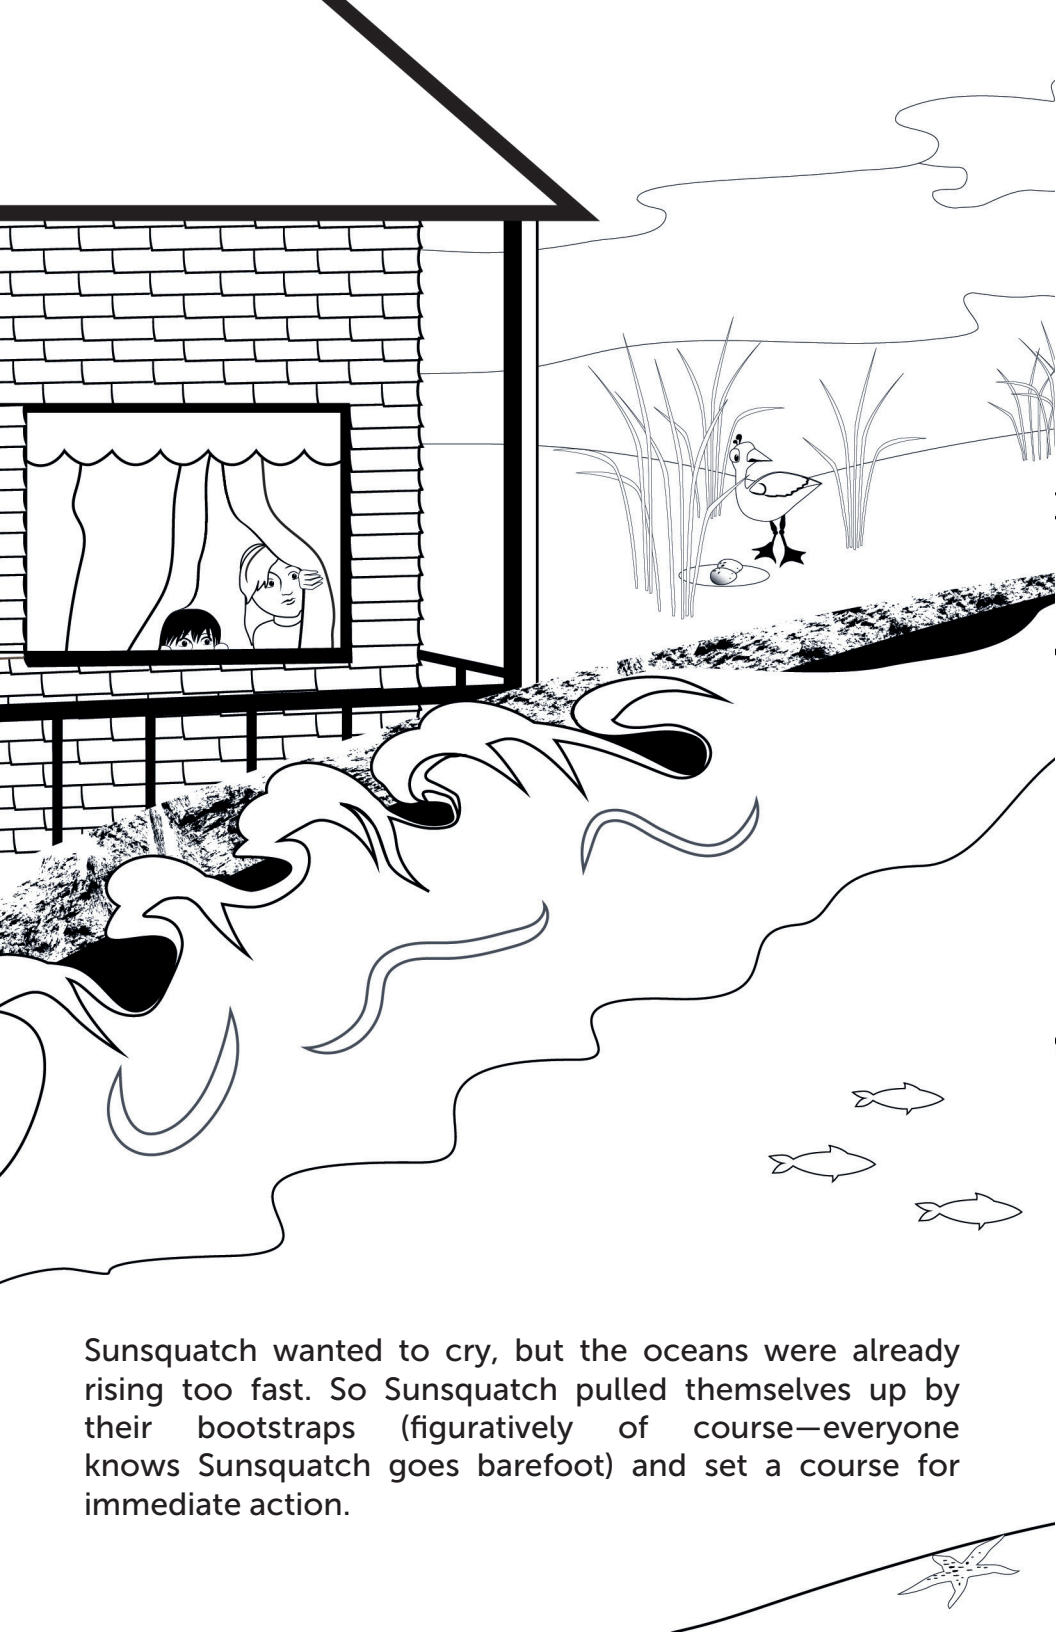

CONNECT THE DOTS

What is making the planet sick?

Connect the dots to help Sunsquatch sleuth out the cause of this catastrophe!

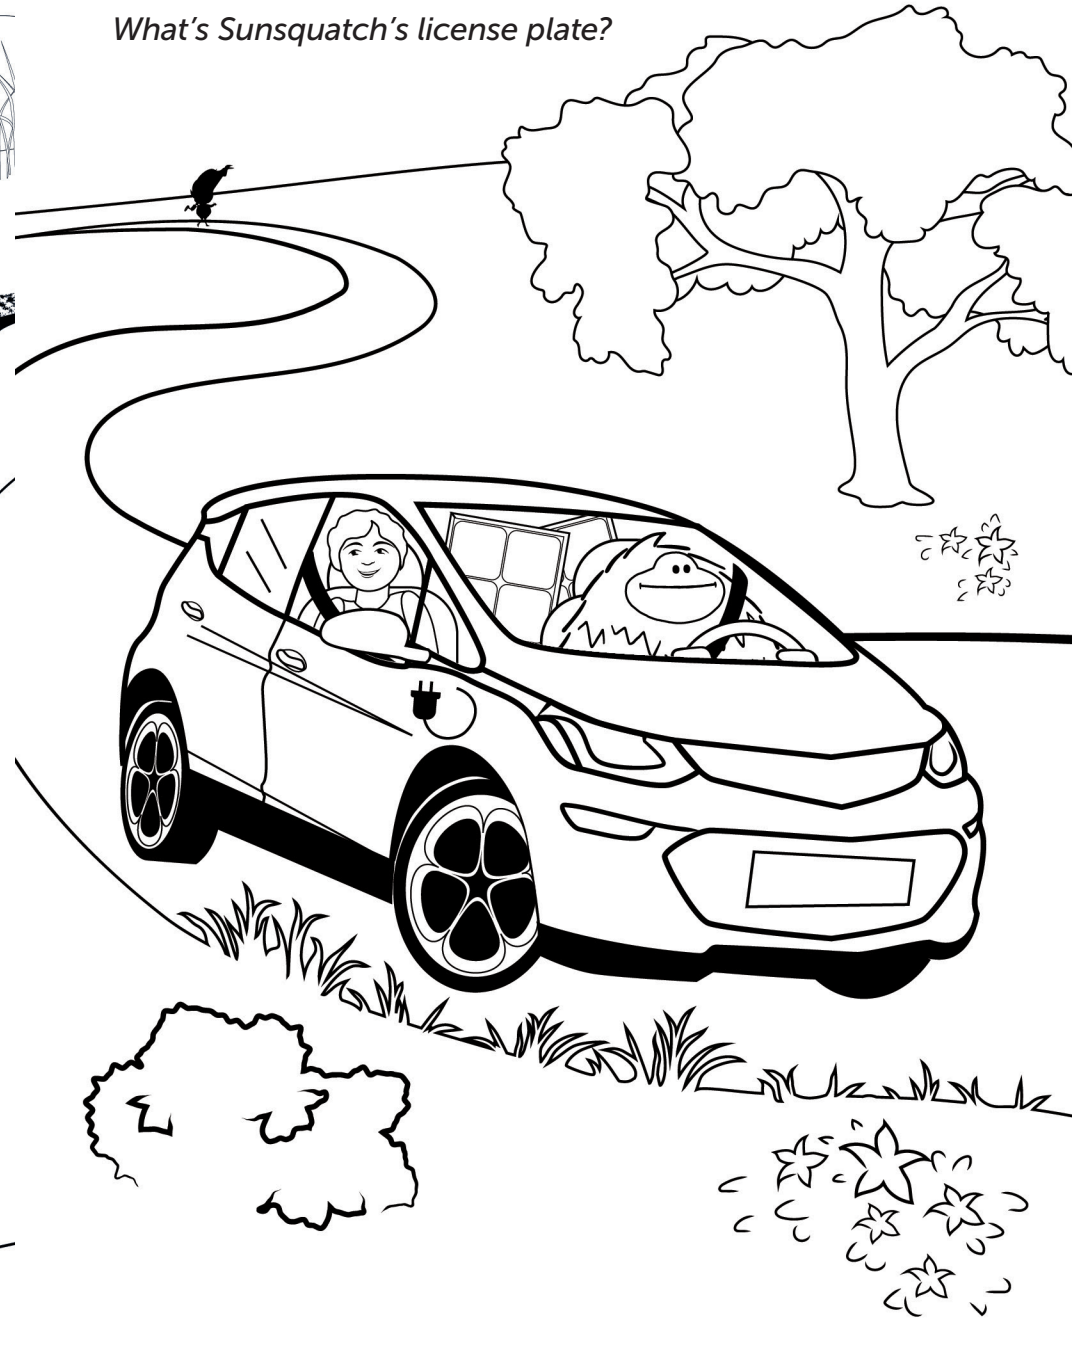

Sunsquatch wanted to cry, but the oceans were already rising too fast. So Sunsquatch pulled themselves up by their bootstraps (figuratively of course—everyone knows Sunsquatch goes barefoot) and set a course for immediate action.

Finally clear of the maze, Sunsquatch found an electric vehicle waiting. Powered on pure sunshine, the emission-free vehicle sped away faster than Baron von Carbon's stumpy, gout-filled legs could chase them. Sunsquatch and their new friends left Baron von Carbon in the dust!

What's Sunsquatch's license plate?

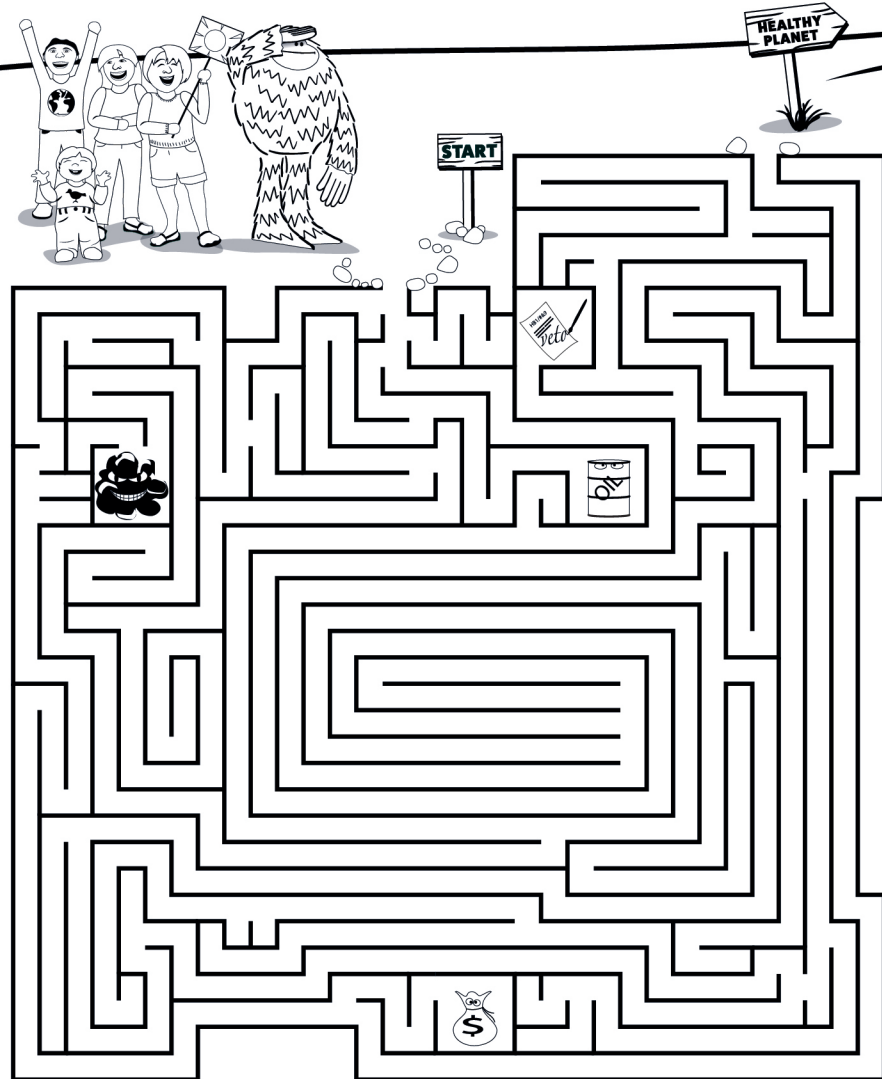

MAZE OF REGULATIONS

With the path forward clear, Sunsquatch and their hopeful followers headed back to the village to set up their renewable energy tech—but crafty Baron von Carbon sneakily directed his cronies and accomplices to set up a bewildering maze of regulations to confuse and discourage.

Help Sunsquatch find their way through the maze!

Trace the path through so Sunsquatch can pass!

FISHING FOR A HEALTHY PLANET

Can you help Sunsquatch clean up the oceans?

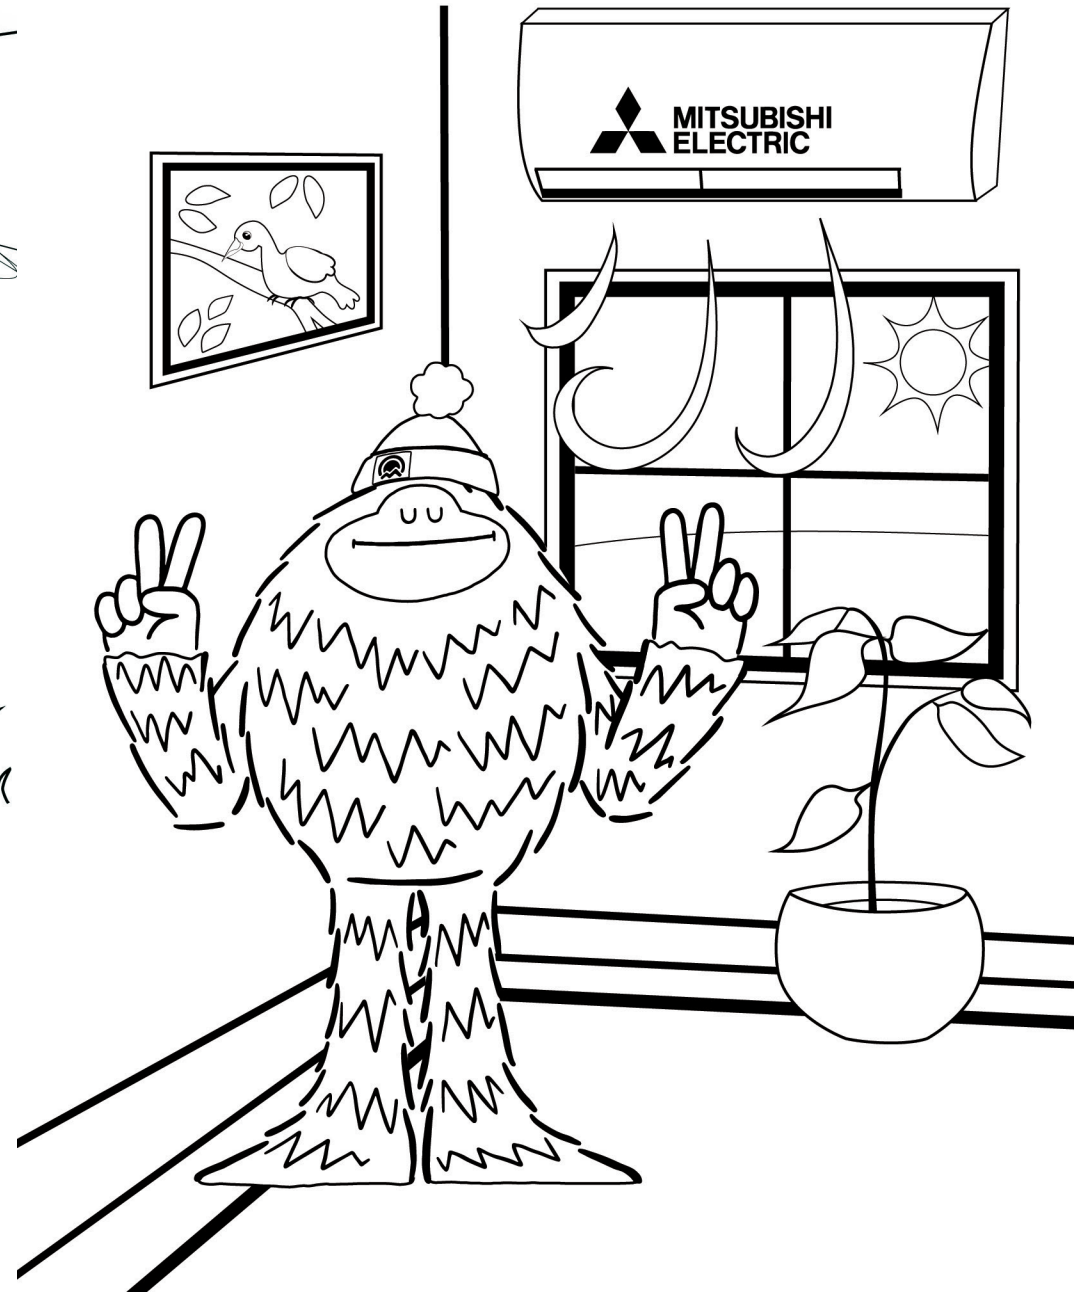

Find and circle all 11 objects that don't belong!

Sunsquatch knew that there was no great planet doctor—the only ones who can help the earth are you and me. Luckily, Sunsquatch knew just where to start.

Finally people understood what the problem was—but Baron von Carbon's sheer anger (and gaseous aura) was already raising the temperature of the planet. Luckily, Sunsquatch found a way to cool all that overheated oil with air source heat pumps powered by solar electricity!

SECRET SUNSQUATCH MESSAGE

You found them all! This time, clever Sunsquatch would bring renewable energy directly to the people—but Baron von Carbon saw and flew into a rage. With vocal chords like old, rusty violin strings, he screamed out a storm of noise that scrambled Sunsquatch’s message.

Help unscramble Sunsquatch’s message!

Use the numbers to decode the word puzzle!

A	B	C	D	E	F	G	H	I	J	K	L	M
		5			13			22				7
N	O	P	Q	R	S	T	U	V	W	X	Y	Z
	8	18		9		12	15					11

TECHNOLOGY MATCH

Help Sunsquatch gather the clean energy technology they need to save the planet!

Draw a line to connect each renewable and energy efficient technology with its name!

LED LIGHTING

ELECTRIC VEHICLES

BATTERY STORAGE

AIR SOURCE HEAT PUMPS

SOLAR PANELS

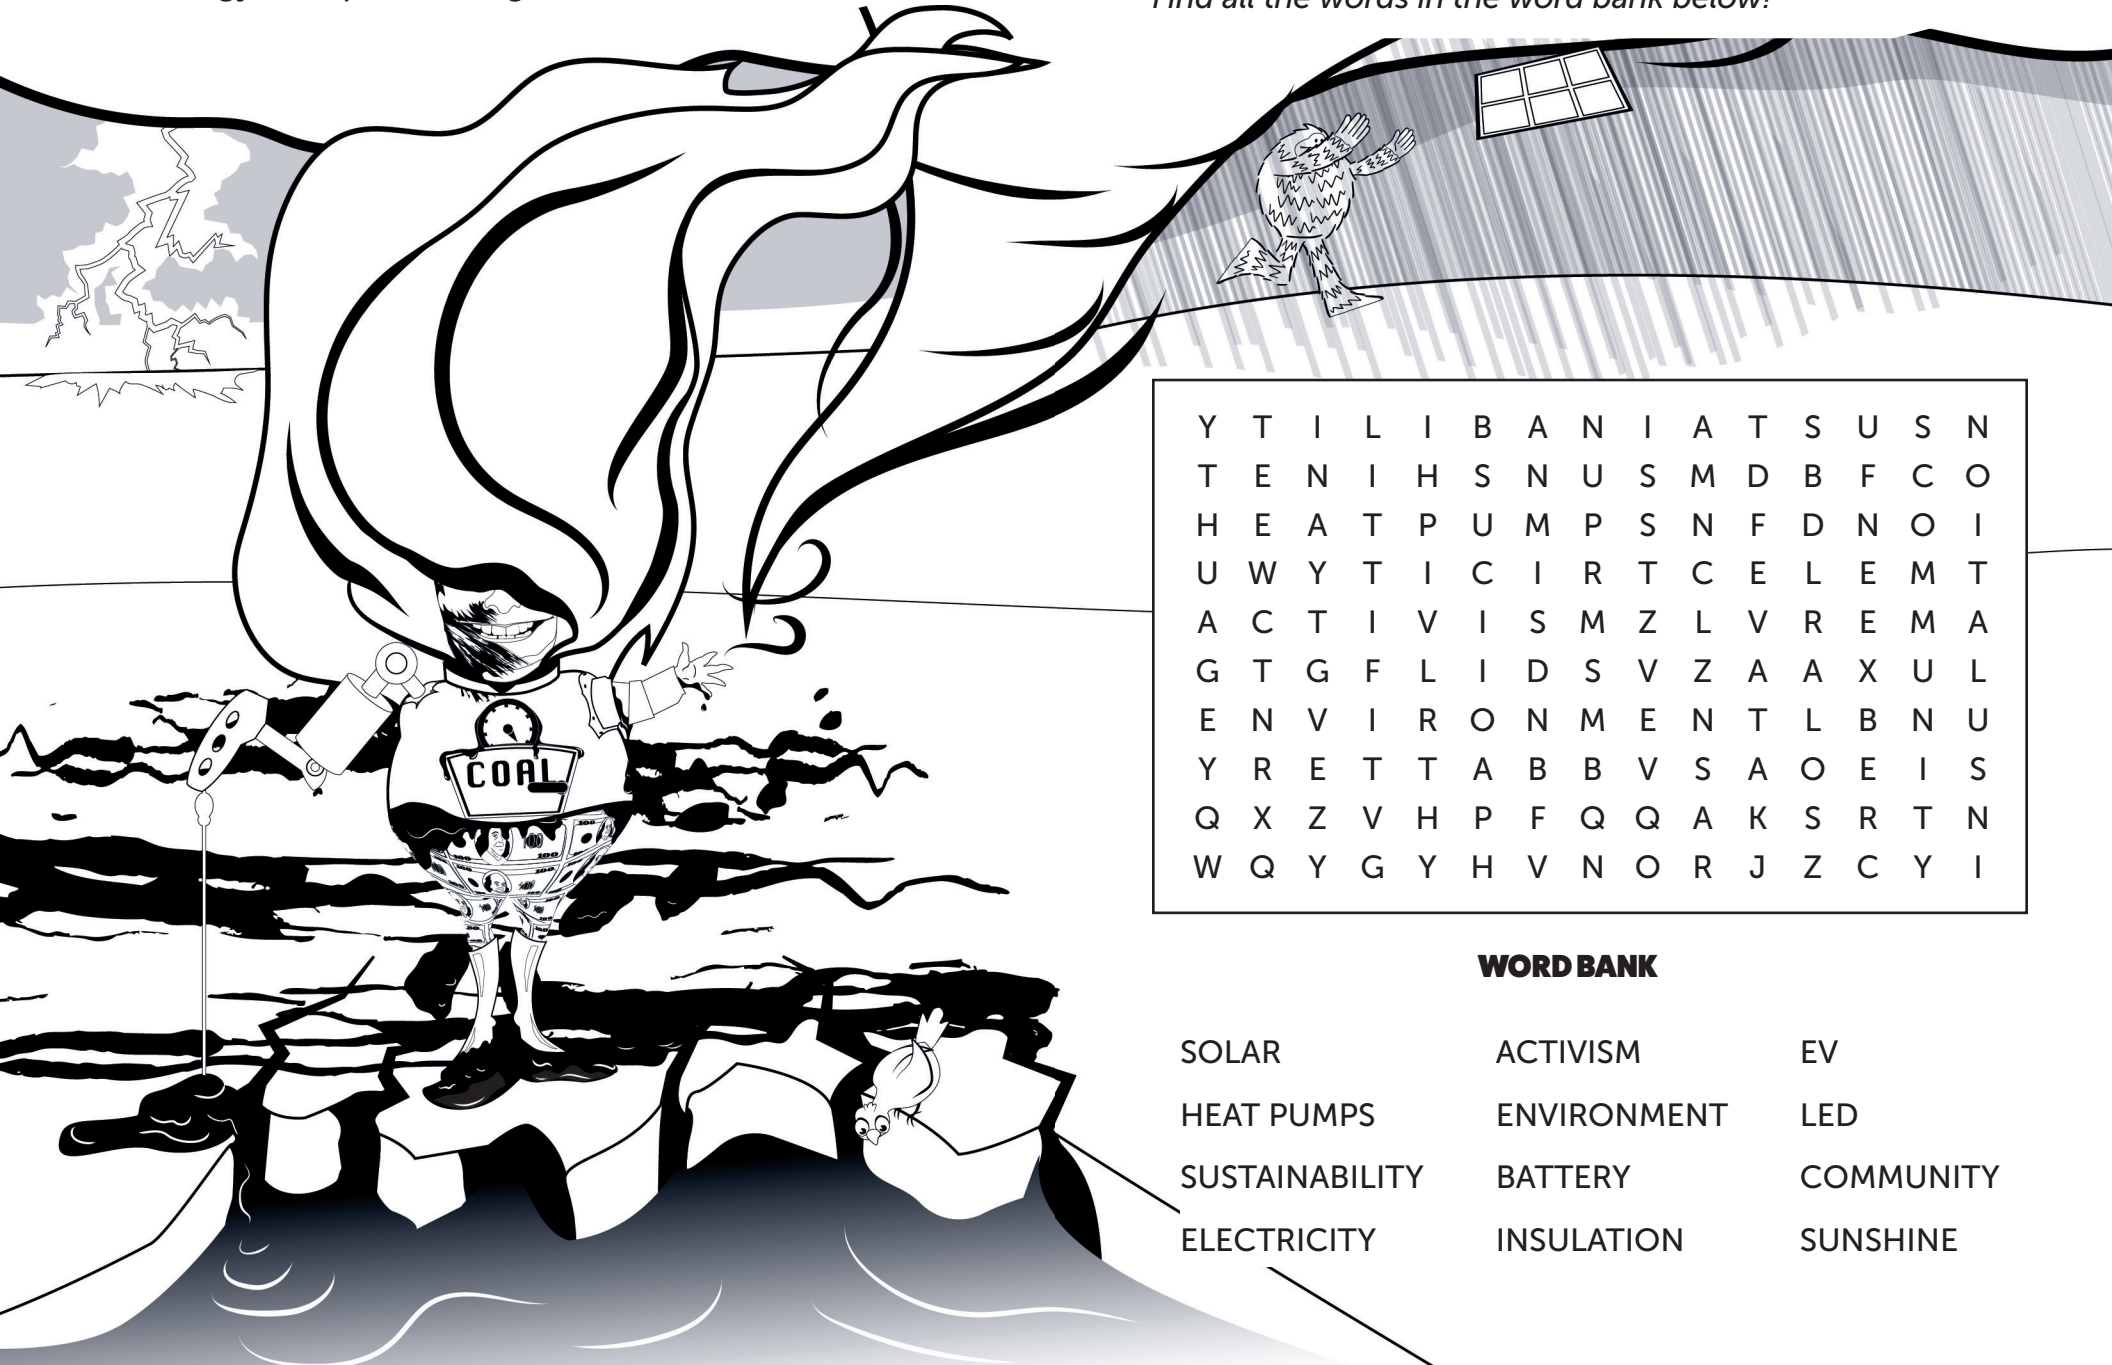

Bearing clean, green technology, Sunsquatch was certain energy companies would change their methods when they saw the innovations they had missed.

Suddenly, with an awful smell of burning oil and greasy dollar bills, a nefarious figure blocked Sunsquatch's path! It was evil Baron von Carbon, who whipped up a ferocious storm and scattered all the clean energy technology Sunsquatch had gathered!

WORD SEARCH

Can you help Sunsquatch find everything again? You might find a few other things you'll need along the way.

Find all the words in the word bank below!
